

17 – 19 APRIL 2026

Stop Pillage is a coalition of various organisations, groups and individuals. We oppose the system whereby the North extracts wealth from the South, as well as its disastrous human and environmental costs. Every year, the Financial Times Commodities Global Summit brings together the heads of the largest trading companies, as well as representatives from the financial and banking sectors, at the Beau-Rivage Palace in Lausanne.

**STOP  
PILLAGE**

**SUMMIT AGAINST  
EXTRACTIVISM  
AND IMPERIALISM**

**PÔLE SUD - LAUSANNE**

We strongly condemn this summit, which symbolises the imperialist policies of the leaders of Switzerland's largest companies, who benefit from the complicity of the political authorities. Stop Pillage will voice its demands during a weekend summit from 17 to 19 April 2026 and a demonstration on 20 April 2026, to denounce the systematic exploitation of the natural resources of the Global South, the racialised and dehumanising treatment of populations, and the ecological repercussions on their lands. Speculators are making billions off the backs of the people! Let's all take to the streets against Swiss imperialism!

# Fri. 17
